

**ADSC SE Chapter Research Program
 Drilled Shafts Socketed into Rock
 Lawrenceville Site Prediction Form**

Form must be submitted no later than COB Friday, August 12, 2011.
 Submit to rthompson@danbrownandassociates.com

Must Specify Units!

Name:	
Position:	
Organization:	
E-mail Address:	
Phone:	

Test 1 Predictions – Rock Socket:

Maximum average unit base resistance in the rock.

Prediction:

Maximum average unit side resistance in the rock.

Prediction:

Unit base resistance at ½ inch displacement.

Prediction:

Test 2 Predictions –Rock Auger Refusal:

Maximum average unit base resistance at “Rock Auger Refusal”.

Prediction:

Maximum average unit side resistance in the PWR.

Prediction:

Unit base resistance at ½ inch displacement.

Prediction:
