

The results are in! The ADSC Southeast Chapter is proud to announce the “winners” from the prediction contest for the Lawrenceville, GA test site. In the table below, we have listed the winner and their prediction. **The winners are the closest to the average measured values as reported by Loadtest, Inc and may not represent the reported maximum values recommended in the final report by DBA.** We won’t release the final report until the ASCE Georgia Section Geotechnical Group meeting November 15, 2011 at 6:30pm at the Georgia Power Company’s Headquarters in Atlanta. Dr. Brown will be presenting the findings then – so come to the meeting and get it first, or look to the DBA or ADSC web sites after November 15th to get the report.

For the winners, Bruce Long will be contacting you concerning your prize.

ADSC Southeast Chapter Research – Lawrenceville Site – Prediction Contest Results

<i>Shaft</i>	<i>Unit Base Resistance (ksf)</i>		<i>Unit Side Resistance (ksf)</i>	
	<i>Name</i>	<i>Prediction</i>	<i>Name</i>	<i>Prediction</i>
1	Gloria Rodgers (Building and Earth Sciences, Inc.)	750	Todd Barber (Geo-Hydro Engineers, Inc.)	50
2	Todd Barber (Geo-Hydro Engineers, Inc.)	690	Tie: Jim Pegues (Southern Company Svcs.) Tom Scruggs (Georgia DOT)	3
